Design and specifications of items in this catalog are subject to change without notice. While the actual product may vary from the photos or descriptions shown, any changes that might occur would not be intended to affect the value of the kit.

1981

This catalog presents to you Monogram's entire line of model kits, many of them new in 1981. In it you will find some of your favorite cars and trucks, the Monogram air force, navy ships, military tanks, even some dinosaur kits. Our increasingly popular Snap Tite® series is well represented among these pages, as is Monogram's special pride, the Super Scale kits.

But our catalog would be incomplete without a mention of those special features that are found in every Monogram kit...the unsurpassed detail, accuracy and authenticity. The realistic decals. The parts that are molded in color and that fit together properly. The quality that has made our name famous since 1945.

7520 Air Aces Assortment. 36 kits.

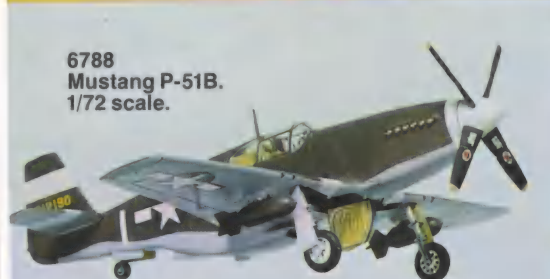

AIRPLANE KITS

Wilbur and Orville Wright's first successful flight on the sands at Kitty Hawk, N.C. in December 1903 brought to reality man's eternal dream to conquer the air. Since that historic event right up to the present jet age, building scale replicas of famous airplanes has been a subject of interest to aviation enthusiasts of all ages. Originally built from scratch, airplane models were sometimes crude, sometimes highly detailed works of art. Today, through the miracle of plastics, model airplane kits offer a high degree of detail and realism. Monogram's line of model airplane kits ranges from historic biplanes of the '20s and '30s to the most modern supersonic jets of today and includes many classics from along the way. Each kit is developed through countless hours of background work and technical research and is an authentic reproduction of an actual aircraft.

8289 Armor Tank Assortment. 12 kits.

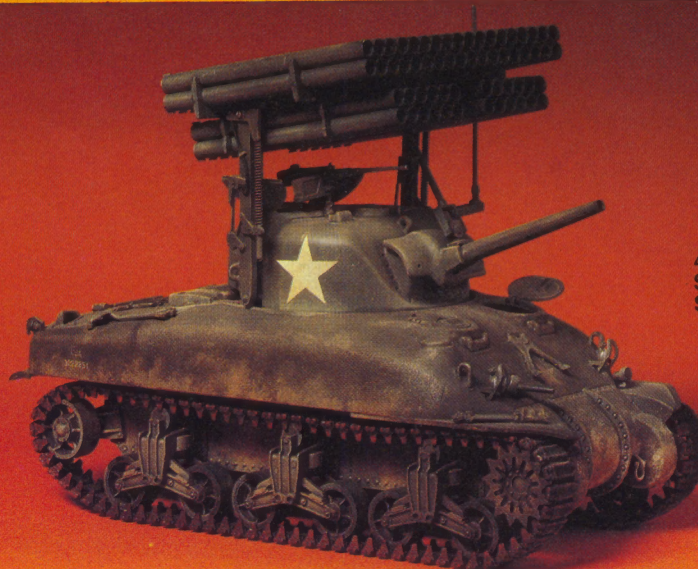

Armor

Building and painting scale models of historic armor weapons and vehicles is a unique hobby with many military enthusiasts. A skilled hobbyist can paint a 1/35 scale figure in likelike realism including detailed facial features and uniform insignia. Tanks and other vehicles can be weathered and "battle-torn" to make them look authentic. Many military modelers will spend countless hours in research to get the proper historic background for the models they build, to be sure that all the details are accurate. Historic reference material also provides suggestions for building the assembled model into a diorama, which may often be a reproduction of an actual situation. Monogram kits are favorites of armor enthusiasts because of the highly realistic details in the models.
